2. Viewmodel

- Data diagram
    - One view model for the main/opening screen which will have all collections and entries laid out
        - List of items, which in this case can be either a collection or entry (use sealed class called MediaItem)
    - view model for specific entry
        - All the details that an entry has, which is:
            - Name of restaurant
            - Name of dish
            - Date
            - Rating
            - List of Images
            - Comments
    - view model for specific collection
        - Name of collection
        - List of entries

3. Extra Data
